Solidarity with the **#HEATHROW 13**

In July 2015 13 climate activists from anti aviation expansion group Plane Stupid staged a safe, non violent direct action at Heathrow Airport, less than a fortnight after the Airports Commission recommended a new runway there.

The action disrupted the UK's second biggest carbon emitter for some hours and resulted in a number of planes being cancelled! The activists now face a prison sentence for aggravated trespass on 24 February 2016.

The action sent a clear signal to Heathrow and the Government: no ifs no buts, no third runway. A third runway is incompatible with tackling climate change – in fact we must reduce flights.

A new runway would not serve ordinary people – 15% of people take 70% of all flights in the UK, and they have a high income. A new runway would cater for rich leisure flyers. The movement that stopped

expansion before will do so again – whether that's at Heathrow or anywhere else!

Ecological crisis won't be solved by governments or the UN – only people power can solve it. And we need many more bold, disruptive actions against polluting infrastructure. It's time for the movement to step up and fully support climate defenders who take principled action. Stand with the Heathrow 13! Solidarity!
